

**Technology Assessment & Partner
Identification – Disposable
Garments Recycling / Disposable
Garment Packaging Recycling /
Degradable Materials**

Case Study

Client	A Leading Player in Personal Care Industry
Industry	Personal Care & Hygiene Industry
Products	Personal Care & Hygiene Products

Engagement Scope

1
Technology Landscape

- Who are the players active in disposable garment recycling / disposable garment packaging / degradable material? What are the details of identified players? (Establish year / employee strength, etc.)
- What are the technologies developed by the players in the area of disposable garment recycling / disposable garment packaging (curbside recycle) / degradable material?
- What are the benefits of identified technologies?
- What is the stage of development? (Research scale / commercial scale)
- Are identified technologies patent protected? (Yes/ No)

2
Partner Identification

- Who could be the suitable partnership (5-6 Partners) candidates in the area of disposable garment recycling/composting? How Client can invest and enable pilot project in this area?
- Who could be the suitable partners which would allow and build economically feasible line of sight for Client to do recyclable packaging in the next 4 years?
- Who are the top companies/ partners/ universities, Client should evaluate to develop/ source degradable (Marine or Soil) materials, specifically in films, non-woven, super-absorbent, adhesives and elastics?
- Which could be the suitable business model for Client business in the area of recycling/composting?

3
FutureBridge Recommendations

- Who are the top players in Europe and Americas focusing on recycling of disposable garments?
- Who are the players using advanced technologies/processes for recycling of disposable garment packaging?
- Who are the players in degradable materials area can collaborate with client based on benchmarking parameters?

Context

- Client is active in hygiene industry and would like to deep-dive assessment in the area of disposable garment recycling, disposable garment packaging and degradable material. Therefore, Client would like to conduct partnership and technology assessment in the mentioned area.

Key Business Questions

- Who are players focusing on disposable garment recycling/composting? Who could be the suitable partners (5-6) in this area?
- What are technologies developed by the players in disposable garment recycling/composting area?
- What are the business models available in this area?
- Who are the players focusing on curbside recyclable packaging for disposable garments? What are the solutions / technologies developed by identified players?
- Who are the top companies / partners / universities, Client should evaluate to develop / source degradable (Marine or Soil) materials, specifically in films, non-woven, super-absorbent, adhesives and elastics?
